ScorchCore Protocol: White Paper Version 1.9

V1 AXIES NFT-2025

1.- Disclaimer

This White Paper is for informational purposes only and does not constitute an offer to sell or a solicitation of an offer to buy any security, token, or financial instrument in any jurisdiction. The information contained in this document is not financial, investment, legal, tax, or any other type of advice.

The \$CORE token is a utility token designed to be used within the ScorchCore Forge Protocol ecosystem. It is not intended to be an investment instrument and should not be considered as such. The value of the tokens lies in their use; \$CORE prices may fluctuate. Participation in the ScorchCore Protocol ecosystem and the acquisition or use of \$CORE tokens involve significant risks, including, but not limited to, technological, market, regulatory, and operational risks.

Potential participants should conduct their own due diligence and consult with their financial, legal, and tax advisors before making any decisions. The ScorchCore Protocol team is not responsible for any loss or damage arising directly or indirectly from the use of the information contained in this White Paper or from participation in the ecosystem. Forward-looking statements contained in this document are subject to risks and uncertainties, and actual results may differ materially. The team assumes no obligation to update or revise any forward-looking statement. By accessing or using this White Paper, you agree to the terms of this disclaimer. If you do not agree with these terms, do not access or use this document or its protocols.

1.2 Our Philosophy: Transgamification & Sovereignty

Mission

"Our mission is to eradicate the Eco-Silent from the Web3 ecosystem, starting with the Eco-Stasis in some Ronin NFT collections, by transforming dormant digital assets into engines of economic productivity through Digital Alchemy. Through the ScorchCore protocol, we provide users (Prospectors) with the tools and knowledge—supported by Transgamification and Blockchain Education principles—to regain sovereignty over their assets, turning the end of one cycle into the birth of a circular, sustainable, and purposeful economy."

Vision

"To become the global standard for Web3 Refurbishment Infrastructure, where no digital asset is forgotten in the void of silence. We aspire to be the leading technological sanctuary that unites the mystique of gaming with financial efficiency, fostering a future where Digital Sovereignty is the norm and where every community can transmute inflation into real value, ensuring the long-term harmony and health of blockchain networks."

2.- Executive Summary (Abstract)

ScorchCore Protocol is an innovative Forge&Collect-to-Earn Gamified Solution starting on the Ronin blockchain before expanding to other networks, designed to activate the latent value of millions of inactive Axies and build a fair and sustainable game economy.

Our vision is simple yet powerful: ScorchCore Protocol is the game that recycles underutilized Axies (V1), converts NFTs into productive mining pets, and establishes a deflationary circular economy on Ronin. It features committed mining cycles that ensure stability, strong anti-bot measures, and community governance.

Through Alchemical Transmutation, players convert Axies into "**CoreMiners**"—**digital pets that mine the \$CORE token**. This creates an ecosystem where the burning of assets is not an end, but the beginning of new utility and an emotional bond with new Collectible NFTs.

“Lore” Introduction

CHAPTER I: THE AWAKENING OF THE CORE

1. The Great Void: Eco-Silence and Eco-Stasis

The Web3 landscape faces its darkest challenge: **Eco-Silence**, a digital vacuum left by abandoned projects and unfulfilled promises. Within the realm of Lunacia, this manifests as **Eco-Stasis**: thousands of Axies have fallen into a state of profound dormancy. They are not "dead," but their vital essence is trapped in a magical dream, held as silent relics in cold storage.

2. The Discovery: Pulse of the Depths

Far from the abandoned combat arenas, the **Core Prospectors**—descendants of ancient alchemists—discovered a massive crystal geode pulsing with the dormant soul of Lunacia within the Forgotten Rifts: the **ScorchCore (The Burning Core)**. This discovery marked the end of the era of loss and the beginning of the era of Rebirth.

3. The Solution: Sacred Alchemy

Unlike traditional "burning" mechanisms that simply delete assets, the ScorchCore Protocol introduces **Sacred Alchemy**. Through the **Alchemical Forge**, the latent energy of assets in Eco-Stasis is liberated and channeled into a new, productive vessel: the **Alchemical Geode**.

4. The Reawakening: CoreMiners

This transmutation process gives life to the **CoreMiners**, techno-magical beings that carry the Axie's legacy into a purer, more energetic form. The **Scorch Heart-Lab** serves as the sanctuary where arcane technology and natural magic entwine, converting silent relics into the engine of a new **Digital Ecology**.

"Eco-Stasis is no longer a finality; it is the starting point of a new techno-science and an evolution toward a future powered by the infinite energy of rebirth".

Table of Contents

PART I: PROJECT FOUNDATIONS

- 1. Disclaimer
 - 1.2 Our Philosophy: Transgamification & Sovereignty
- 2. Executive Summary (Abstract)
- 3. Our Value Proposition
 - 3.1. Massive Excess of Inactive Axies & Solutions
 - 3.2. Lack of On-Ramps: Scholarship System 2.0
 - 3.3. Threat of Bots: Multi-layered Fair Play System
 - 3.4. The Circular Alchemy: Treasury & Asset Release Protocol
- 4. Unique Value for Ronin
- 5. Introduction: The Problem and the Opportunity

PART II: ECOSYSTEM ARCHITECTURE

- 6. ScorchCore Protocol: The Solution
 - 6.1. Game Concept and Lore
 - 6.2. Strategic Synergies with Ronin
 - 6.3. Key Mechanics and Unique Innovation
 - 6.4. "Ecosystem Healing": The Phoenix Protocol
- 7. Key Game Mechanics
 - 7.1. Axie NFT Forging: "Scorch Transmutation"
 - 7.2. Alchemical Hatching & Rarity
 - 7.3. Recipe Deployment Strategy: "Opening the Seals" (GTM1)(Recipes, Geodes & Coreminers)
 - 7.4. Go-to-Market 2 Strategy: "The Awakening of Genesis Mining" (Token \$CORE)
 - 7.5. Forge Cycles and Finite Supply
 - 7.6 Staking Axie NFTs for Base Mining Power ("Axie Resonance Mining")
- 8. \$CORE Token Mining

- 8.1. Total Mining Power Variables
- 8.2. Resonance Power vs. Productive Power Calculations
- 8.3. The Master Formula ($\$P_{\{TOTAL\}}$)
- 8.4. Mining Cycles and Strategic Commitment
- **9. Advanced Systems**
 - 9.1. "Burnt \$CORE Fusion" Mechanism
 - 9.2. Voracious CoreMiner
 - 9.3. Minigames: "Core Stabilization Challenges"
 - 9.4. CoreMiner Collections and Set Synergies
 - 9.5. Account Level Forge Tickets
 - 9.6. Soulbound NFTs for Achievements and Loyalty
 - 9.7. CoreMiner Lending Module (Scholarship System 2.0)

PART III: TOKENOMICS AND SECURITY

- 10. \$CORE Tokenomics
 - 10.1. Total Supply and Emission Schedule (Halving)
 - 10.2. Distribution Summary & Vesting Schedule
 - 10.3. Utility and Burning Mechanisms (Sinks)
 - 10.4. Resource Locking & Circular Economy
 - 10.5. Creator Fee and Ecosystem Sustainability
- 11. Anti-Bot Measures and Fair Play
 - 11.1. On-Chain Reputation System (Trust Score)
 - 11.2. Sovereign Identity: IdNFT (Proof of Humanity)
 - 11.3. Two-Layer Accumulation System: fCORE and CORE

PART IV: EXECUTION AND DEVELOPMENT

- 12. Roadmap (Phases 1-5)
- 13. Team and Advisors
- 14. Smart Contracts Overview
- 15. Growth Strategy and Governance
 - 15.1. Governance (DAO)
 - 15.2. Community Development Competitions: The "Creator Forge"
- 16. Fund Allocation (Year 1 Budget)
- 17. Social Responsibility
- 18. Conclusion

- 19. Appendix A: Glossary

3.- Our Value Proposition

3.1. Massive Excess of Inactive Axies

- **Problem:** Eco-Silence on Blockchains and Eco-Stasis on Ronin, Millions of NFTs (Axies) with limited utility beyond breeding.
- **ScorchCore Solution:** "Alchemical Transmutation" — A **Forge&Collect-to-Earn** mechanism with purpose.
- **Impact Metric:** New utilities for NFTs and sustained burning of Axies at different rarity scales.

3.2. Lack of On-Ramps for New Users

- **Problem:** Economic barriers for new players.
- **ScorchCore Solution:** In-person events, Scholarship System 2.0 + F2P Minigames.
- **Impact Metric:** Education with onboarding & Zero entry cost with real revenue streams.

3.3. The Threat of Bots and Unfair Practices

- **Problem:** Bots, multi-accounts, and incomplete development damage economies and trust.
- **ScorchCore Solution:** A multi-layered fair play connecting "AxieCore" plus a system led by an On-Chain "Trust Score" and robust Proof of Humanity (PoH).
- **Impact Metric:** Recurrent transactions via mining cycles.

3.4. The Circular Alchemy: Treasury & Asset Release Protocol

To ensure the long-term sustainability of the \$CORE ecosystem and the Ronin Network, ScorchCore Protocol operates under a **Strict Circular Economy** model. This process transforms inactive assets (Eco-Stasis) into liquid economic utility through the following stages:

A. Transition of Ownership (The Offering)

When a Prospector initiates a Forge recipe (across all **Petit** and **High** tiers), the Axies used as ingredients undergo a custody transfer. Ownership is moved from the Prospector's wallet to the **ScorchCore Treasury Vault**. This step is final and marks the beginning of the alchemical transmutation. In exchange, the protocol issues the corresponding **Alchemical Geode** to the Prospector.

B. The Strategic Release (Digital Ecology)

The ScorchCore Treasury does not hoard dormant assets. To complete the cycle, the protocol executes a **"Release"** using the official Axie Infinity release tools. This action serves two critical purposes:

1. **Supply Deflation:** By permanently removing Axies from the circulating supply, we contribute to the scarcity and health of the broader Ronin ecosystem.
2. **Memento Harvesting:** The protocol captures the **Mementos** generated by the release process. These assets are then managed by the Treasury to support the protocol's DeFi infrastructure.

C. DeFi Integration & Ecosystem Value

The resources harvested from the Release Protocol (Mementos and associated rewards) are utilized to:

- Inject liquidity into the **\$CORE** ecosystem.
- Stabilize the treasury backing for future CoreMiner production.
- Foster a **Digital Ecology** where every "burned" NFT directly fuels the mining power and rewards of active Prospectors.

"In ScorchCore, no asset is lost; it is simply reborn as the fuel for a new digital dawn."

NOTA: "This process is irreversible. By forging, the Prospector acknowledges the permanent contribution of their assets to the Protocol's Treasury and the subsequent Release Protocol."

4.- Unique Value Proposition for the Ronin Ecosystem

"ScorchCore is not an asset sink; it is the circulatory system that Ronin needs to transform its technical debt (idle NFTs) into economic fuel."

A. Resolving the "Eco-Stasis" (Long-Term Sustainability)

Ronin has millions of Axies and project assets that have left the network (such as Realms of Alurya collections). These assets are "dead weight" in the database and in market sentiment.

- Value for Ronin: ScorchCore acts as a "Digital Waste Management" layer. By incentivizing controlled burning (transmutation) through the Phoenix Protocol, we reduce the

oversupply of useless or inactive NFTs, improving the experience for collectors and holders.

B. Liquidity Retention Flywheel (\$RON & \$AXS)

Unlike other projects that extract value from Ronin to take it to other chains, ScorchCore is designed to reinject vitality:

- **Treasury Yield Backing:** Assets deposited in the Scorch Heart-Lab are held within the Ronin ecosystem (staking \$AXS/\$RON). The returns generated are used to repurchase \$CORE, creating a value cycle that never leaves the network.
- **Burn-to-Reactivate Mechanics:** We transform a user with "latent losses" (NFTs they cannot sell) into an "active prospector" who re-engages with Katana DEX and the Marketplace.

C. The "Phoenix Protocol": A Security Network for Third-Party Developers

Ronin aims to be the home of hundreds of games. However, when a game crashes, the network's reputation suffers.

- **Unique Value Proposition:** ScorchCore offers the Phoenix Protocol, an infrastructure where assets from failed or migrated projects can be accepted as "Forge Ingredients." This reduces user churn on Ronin; players don't leave the network when a game closes, but instead transfer their assets to ScorchCore to start a new adventure. This makes Ronin the blockchain with the best consumer/player protection in the Web3 world.

D. Trust Score & Anti-Bot Infrastructure

Sky Mavis constantly fights against bot farms that bleed game economies dry.

- **Technical Contribution:** Our architecture requires Proof of Humanity and an on-chain reputation-based Trust Score to access high-level forges (Tiers like Tank or Ultramech). We are building a "Quality Players" database that Ronin could use for other game releases, ensuring that incentives reach real humans.

5.- Introduction: The Problem and the Opportunity

The rise of NFTs and blockchain gaming has revolutionized digital ownership. However, exponential growth has revealed challenges threatening sustainability and trust. ScorchCore Protocol turns these problems into opportunities for innovation.

- **5.1. Wasted Potential in the NFT Ecosystem:** Countless NFT collections, including millions of Axies, lie devalued or without practical use beyond speculation. This is wasted creative and economic energy.
- **5.2. The Threat of Fraudulent Projects:** The lack of regulation has created fertile ground for SCAMs and unethical players using bots. (examples like: Reals of Alurya: warriors, pets, items, lands, pass to airdrops the game lasts for one month or RONEN MINERS: your website does not work, etc)
- **5.3. Our Vision:** Revalue existing NFTs, build a sustainable economy, promote fair play, and foster transparency.

PART II: ECOSYSTEM ARCHITECTURE

6.- ScorchCore Protocol: The Solution

6.1. Game Concept and Lore. After eras of glory, millions of Axies fell into a lethargy known as "Eco-Stasis," leaving their immense potential without purpose. In this silence, a clan of modern alchemists, the **Core Prospectors**, discovered the **ScorchCore** deep within Lunacia.

They found the lost science of "**Alchemical Rebirth**." This sacred art does not destroy; it transforms. It releases the vital essence of an Axie in Eco-Stasis into a new crystalline vessel, birthing a CoreMiner: the continuation of the Axie's legacy in pure energy form. Players use the "**Scorch Heart-Lab**" to give their Axies a new purpose.

6.2. Strategic Synergies with the Ronin Ecosystem

ScorchCore is a catalyst for Ronin. Every mechanic is designed to generate significant transactions, revitalize existing assets, and attract new users, addressing key KPIs for the network

6.3. Key Mechanics and Unique Innovation

1. **Alchemical Transmutation (Forge&Collect-to-Earn):** Converting static assets (Axies/Mementos) & Tokens (AXS ó RON) into active value generators (CoreMiners).
2. **On-Chain Reputation System (Trust Score):** Dynamic score based on account age and human behavior. High scores unlock rare recipes and higher burn limits.
3. **Skill Competition with Real Economic Consequences:** PvP "Core Assault" where skill translates to direct economic advantage.
4. **Circular Economy with Constant Burning (Voracious CoreMiner):** A special class of miner that requires periodic "feeding" with Axies to maintain high efficiency.
5. **Finite Supply and Verifiable Collectibility:** Each CoreMiner recipe has a global maximum supply. Once depleted, the recipe is retired, creating real scarcity .
6. **Scholarship System 2.0:** Decentralized rental market without ownership transfer risk.
7. **AI Analyzer for Dynamic Recipes:** AI analyzes Ronin market data to create dynamic transmutation recipes that incentivize burning oversupplied Axies.
8. **Mining Cycles with Contractual Locking:** Players choose cycles (1 week to 3 months). Longer cycles offer bonuses.

6.4 "Ecosystem Healing" Recovery of Abandoned Assets: The "Phoenix" Protocol

Protocol acknowledges a painful reality in the Web3 space: the existence of unethical developers who have abandoned their communities, leaving NFT collections devoid of utility and damaging trust within the ecosystem. To combat this, we are introducing "Phoenix Expansion Recipes." This initiative will allow users to utilize NFTs from failed or inactive projects on the network (such as *Realms of Alurya*, *RONEN Mining*, *Pixiland*, *Ragnarok: Monster world* and others selected by the DAO) as catalysts in the Forge. Although these assets lost their original promise, ScorchCore grants them a second life, allowing them to be transmuted into materials or boosters to craft new CoreMiners. We do not simply recycle the digital asset; we restore value and morale for the holders who believed in the Ronin ecosystem.

7.- Key Game Mechanics

7.1. Axie NFT Forging "Scorch Transmutation" and the Role of Mementos. Players accept a recipe and select Axies to transmute in "The Scorch Heart-Lab". The process generates a generic egg (Alchemical Geode) with 7 distinct possibilities of hatching into a unique CoreMiner.

- **Phase 1: The Alchemical Forge.** Players select the recipe they wish to forge and commit the necessary resources. Extra Mementos can be offered to reduce the forge's failure rate.
 - *Result:* A "Alchemical Geode" (Intermediate NFT). It can be staked, traded, or hatched .

7.2. Phase 2: Alchemical Hatching. Consumes the Geode to reveal a definitive CoreMiner based on a probability table (including a 1% chance for a Critical/Ultra-Powerful version).

7.3. Recipe Deployment Strategy: "Opening the Seals" (GTM1)(Recipes, Geodes & Coreminers)

Phase 1: The Awakening (Launch / 9 Weeks)

Objective: Mass onboarding and clearing inactive inventory.

Unlocked Recipes: "Petit Geode" type (Basic).

Available Classes: All 9 Classes (Beast, Aqua, Bird, Plant, Reptile, Bug, Dusk, Dawn, Mech).

Logic: By launching the "Petit" type for all classes (1 class per week), activating each class at different times. This will help test network activity and the functionality of the forging contract.

Requirement: FREE FORGING Level 0 (No Burn Ticket).

Phase 2: Specialization (6 Weeks)

Objective: Increase the difficulty and cost of Alchemical Forging.

Unlocked Recipes: "High Geode" type.

Unlocked Recipes: Deployed every 2 weeks by triads.

Weeks 1-2: (Plant, Reptile, Bird)

Weeks 3-4: (Beast, Bug, Aqua)

Weeks 5-6: (Dusk, Mech, Dawn)

Requirement: FREE FORGING Level 0 (No Burn Ticket).

Ratio: The "High" type offers better stats than the "Petit" type. By rotating the classes, we create mini-market cycles where the demand for specific types of Axies increases each week.

Phase 3: Wild Instinct (6 Weeks)

Objective: Introduce the Wild Collection (Art focused on Axies classes).

Unlocked Recipes: "Animal Geode" Type.

Unlocked Recipes: Deployed every 2 weeks by triads.

Weeks 1-2: (Plant, Reptile, Bird)

Weeks 3-4: (Beast, Bug, Aqua)

Weeks 5-6: (Dusk, Mech, Dawn)

Requirement: Level 1 (Astral License).

Phase 4: The Machine Age (6 Weeks)

Objective: Mass Token Burning.

Unlocked Recipes: "Ultra-Mechanical Geode" Type.

Unlocked Recipes: Deployed every 2 weeks by triads.

Weeks 1-2: (Plant, Reptile, Bird)

Weeks 3-4: (Beast, Bug, Aqua)

Weeks 5-6: (Dusk, Mech, Dawn)

Requirement: Level 2 (Nebula Edict).

Phase 5: The Wall of Lunacia (6 Weeks)

Objective: High-End Content, Financial Stability, and Long-Term Retention.

Unlocked Recipes: "Tank Geode" Type.

Unlocked Recipes: Deployed every 2 weeks by triads.

Weeks 1-2: (Plant, Reptile, Bird)

Weeks 3-4: (Beast, Bug, Aqua)

Weeks 5-6: (Dusk, Mech, Dawn)

Requirement: Level 3 (Soul Grant).

7.4. Go-to-Market Strategy: "The Awakening of Genesis Mining" (GTM2)

Following the completion of the revelation phase of the 45 V1 recipes (Phase 5: The Wall of Lunacia), the protocol activates its "Utility and Performance" model. This phase marks the birth of the ecosystem's intrinsic value.

- At this same stage, the "**Activation of Synergy Sets**" takes place, encouraging Prospectors to create their best POWER trinities or to market with them.
- To complete the launch of Genesis Mining, the implementation of **Repair Costs** (Sustainability from Day 1) will begin. Mining triggers wear and tear on CoreMiners, introducing a maintenance cost of 3% to 6% per month in CORE. (**The sink immediate**)

7.5. Forge Cycles and Finite Supply: Once the global limit for a specific CoreMiner recipe is reached, it is retired, rewarding early adopters.

7.6. Staking Axie NFTs for Base Mining Power ("Axie Resonance Mining")

- Each Axie will contribute a power of 1 (it cannot be affected by bonuses)

8.- \$CORE Token Mining

8.1. Total Mining Power Variables

8.2. Resonance Power vs. Productive Power Calculations

Total Power is divided into two categories:

2. **Resonance Power (Axes):** Base, stable power from staking original Axes. Never affected by bonuses.
3. **Productive Power (Geodes & CoreMiners):** Dynamic power affected by bonuses (Collection, Sets, Events).

Definition of Variables

Variable	Symbol	Description
Resonance Power	P_Resonancia	The sum of the power of all staked Axes.
Geode Power	P_Geodas	The sum of the base power of all staked Geodes (Eggs).
CoreMiner Power	P_CoreMiners	The sum of the base power of all staked CoreMiners.
Base Productive Power	P_Prod_Base	The sum of the power of Geodes and CoreMiners before bonuses.
Bonuses	ΣB	The sum of all bonus multipliers

		(Collection, Set, etc.).
Total Player Power	P_TOTAL	The player's final power for the cycle.

8.3. The Master Formula (\$P_{TOTAL}\$)

1. Calculating Resonance Power (P_Resonance) This power is a fixed allocation for each Axie locked in the AxieStakingManager.

- Rule: 1 Axie locked for a full cycle (e.g., 1 month) grants a fixed power.
- Example: 1 Axie in Staking = 1 General Power
- This value is straightforward and is not multiplied by any bonuses.

Formula: $P_{Resonance} = (\text{Number of Axies in Staking}) * 1$

2. Calculating Productive Power (P_Productive_Final) This is the power that rewards active participation in the protocol (forging and hatching).

Step 2a: Calculate Base Productive Power (P_{Prod_Base})

The base power of all protocol assets that the player has staked is added together.

$P_{Prod_Base} = (\sum P_{CoreMiners}) + (\sum P_{Geodes})$

(Note: Staking Geodes grant a DIFFERENT base power than CoreMiners, incentivizing HODLing and hatching).

Step 2b: Calculate Bonuses ($\sum B$)

All applicable percentage bonuses are added together, such as the "Collection Bonus" and "Set Bonus" (mentioned in the Forging Manual) and other bonuses (PvP, events).

$\sum B = (\text{Collection Bonus \%}) + (\text{Set Bonus \%}) + (\text{Global Bonus \%})$

Step 2c: Calculate the Final Productive Power

The bonus multiplier is applied to the base productive power.

$\text{Final_Productive_Power} = \text{Base_Productive_Power} * (1 + \sum B)$

3. The Master Formula (P_TOTAL) The player's total power is the simple sum of their

Resonance Power (without bonus) and their Productive Power (with bonus).

$$P_{TOTAL} = P_{Resonance} + P_{Final_Productive}$$

Substituting the formulas above:

$$P_{TOTAL} = (\sum P_{Axes} * 1) + [(\sum P_{CoreMiners}) + (\sum P_{Geodes}) * (1 + \sum B)]$$

8.4. Mining Cycles and Strategic Commitment. Players lock CoreMiners in the MiningScheduler.sol contract.

- Short Cycle (1 week): Testing/Casual.
- Standard Cycle (2 weeks): Balance.
- Committed Cycle (1 month): High efficiency.
- Strategic Cycle (2 months): Long-term holders.
- Master Cycle (3 months): Maximum commitment. Unlocks loyalty bonuses (e.g., +5%).

9.- Advanced Systems: Management and Upgrades.

9.1. "Burnt \$CORE Fusion" Mechanism: Players can reduce upgrade costs by "fusing" the required \$CORE with other ecosystem tokens like AXS or RON.

9.2. Voracious CoreMiner: A specific miner type requiring constant burning of Axes to function.

9.3. Minigames ("Core Stabilization Challenges") F2P flash games (40-60 seconds) to earn raw resources. It begins upon completion of the first year of mining V1.

- **Social and Competitive Interaction** Leaderboards, Guilds (Optional), Special Events.
- **"Core Assault" Mode** - Competitive Power Theft 1vs1 duels to temporarily steal mining power from opponents via skill-based minigames.

9.4 CoreMiner Collections and Set Synergies. Completing specific sets grants passive mining bonuses.

10 Synergy Mechanics “per Set” for CoreMiners:

Set Name	Types of CoreMiners Required	Mining Power Bonus
Night Hunter	Beast+ Bird+ Dusk	1,50%
Aquatic Ecosystem	2 Aqua + 1 Plant	2,00%
Advanced Machinery	2 Mech + 1 Ultramech	1,50%
Ancient Guardian	Reptile + Plant + Dawn	2,00%
Symbiotic Swarm	3 Bug (mismo subtipo)	1,00%
Elemental Fusion	Beast+ Reptile + Aqua	1,00%
Cosmic Balance	Dawn + Dusk + Mech	1,00%
Impenetrable Defense	2 Tanque + 1 Plant	2,50%
Silent Stalking	2 Dusk + 1 Bird	2,50%
Primordial Rebirth	Dawn + Plant + Aqua	2,00%

(Note: A ScoreMiner engaged in a set synergy cannot activate another synergy.)

We developed an additional document to explain the complete "Synergy Set" list.

9.5. Account Level Forge Tickets. Access to powerful recipes is regulated by Forge Ticket **Level 0 ("Free Prospector Pass")**: Access to all Basic (Petit) recipes that do not require a ticket.

Level 1 ("Astral License"): Grants access to Rare recipes (Geode "Animal").

Level 2 ("Nebula Edict"): Unlocks access to Advanced recipes (Geode "Ultramech").

Level 3 ("Soul Grant"): Grants access to the most exclusive Advanced recipes, which typically require a combination of Axie classes (Geode "Tank").

9.6. Soulbound NFTs for Achievements and Loyalty.

Non-transferable NFTs awarded for milestones (e.g., Forge 10+ Axies, high Trust Score). They provide permanent perks like reduced repair costs.

9.7. CoreMiner Lending Module (Scholarship System 2.0). A smart contract divides \$CORE rewards automatically between owner and scholar without transferring NFT ownership.

PART III: TOKENOMICS AND SECURITY

10.- \$CORE Tokenomics

10.1. Token Name: \$CORE.

- Total Supply: 2,100,000,000 \$CORE (Finite).
- Emission Schedule: Inspired by Bitcoin, emission rewards reduce by 50% annually ("Halving") to control inflation.

Year	Annual \$CORE Issuance	Cumulative Issuance	% of Total Supply Issued (Cumulative)
1	525,000,000	525,000,000	25.00%
2	262,500,000	787,500,000	37.50%
3	131,250,000	918,750,000	43.75%
4	65,625,000	984,375,000	46.88%
5	32,812,500	1,017,187,500	48.44%
6	16,406,250	1,033,593,750	49.22%
7	8,203,125	1,041,796,875	49.61%
8	4,101,563	1,045,898,438	49.80%
9	2,050,781	1,047,949,219	49.90%
10	1,025,391	1,048,974,610	49.95%
11	512,695	~1,049,487,305	~49.98%
12	256,348	~1,049,743,653	~49.99%
...	...	...	...
Until Sold Out	-	1,050,000,000	50.00%

10.2. Distribution Summary

- Mining Rewards & Staking: 50% (1,050,000,000). (Staking begins in the second year)
- Ecosystem Treasury & DAO: 20%.
- Rewards (Adoption/Airdrops): 15%.

- Team & Advisors: 10%.
- Initial Liquidity (Katana): 5%.

Table: Release (Vesting) Schedule

Entity	Cliff Period	Vesting Period	Frequency
Treasury and DAO	12 months	48 months (Linear)	Months
Team and Advisors	12 months	36 months (Linear)	quarterly (each 4 months)

10.3. Utility and Burning Mechanisms (Sinks)

The ScorchCore Protocol ecosystem is designed to strengthen the value of Ronin network assets and ensure the scarcity of the \$CORE token. Utilities and value sinks are defined under the following pillars:

- **AXS as an Alchemical Catalyst:** Transmuting inactive Axes into CoreMiners requires a specific amount of AXS. This asset acts as the energetic fuel needed to stabilize the forging process.
- **Staking Mechanism (AXS):** AXS obtained through forging recipes are not simply spent; they are locked in the native staking protocol, or farming on Katana. This allows the project to generate passive income that supports the Ecosystem Treasury and funds \$CORE repurchases to maintain a healthy minimum price. **"Yield Engine"**
- **CoreMiner Upgrading and Repair:** The use of \$CORE is mandatory for improving mining stats, repairing pets' "Mood," and unlocking visual evolutions.
- **Deflationary \$CORE Burn:** A percentage of the \$CORE token used in creating Elite CoreMiners, purchasing cosmetics, and acquiring Burn Tickets (such as the Astral License or Nebula Edict) is permanently burned.
- **Value Alignment with Ronin:** By staking AXS, which would be part of the cost of creating CoreMiners, ScorchCore reduces the circulating supply of AXS in the market, aligning the interests of our players with those of the Ronin network.

10.4. Resource Locking and Circular Economy:

Forged Axes: The Axes used in recipes become part of the ScorchCore Treasury. Then, to further harmonize the ecosystem, these will be released in the official "Release" protocol, providing Mementos NFTs as liquidity for \$CORE.

Forged AXS: The liquidity obtained through Native Staking will be used as liquidity for the \$CORE token.

Forged Mementos: Memento NFTs obtained from Recipes and Releases will be one of the most important tools in the ScorchCore ecosystem, as they will be given as rewards to the active community through quests, events, and liquidity for \$CORE. This will deliver: Importance, Value, On-chain Activity, and new uses for Memento NFTs.

Strategic Alignment with the Ronin Network: By incentivizing long-term AXS lock-in, ScorchCore positions itself as a key player for Sky Mavis. This model reduces selling pressure in the global Ronin market and demonstrates the protocol's deep commitment to the stability and growth of the entire network.

10.5. Creator Fee and Ecosystem Sustainability

To ensure a continuous development and support cycle, ScorchCore Protocol will implement a 5% creator fee on all secondary sales of Geodes and CoreMiner NFTs made on Ronin Marketplace and other supported platforms.

11.- Anti-Bot Measures and Fair Play

11.1. On-Chain Reputation System: The "Trust Score" A dynamic score calculated based on Account Age, Human Play Patterns, connected to the Axiecore reputation and Social Participation. High scores allow higher withdrawal limits and access to exclusive content.

11.2. Sovereign Identity: IdNFT A decentralized Proof of Humanity (PoH) system using a mobile app with 12 verification tests to prove user humanity without invading privacy.

11.3. Two-Layer Accumulation System: fCORE and CORE

- **fCORE (First CORE):** A Soulbound, non-transferable token representing "mining work." It accumulates in real-time.
 - **Conversion:** fCORE converts to tradable \$CORE only after passing the Trust Score and Proof of Humanity checks. This prevents bot farms from extracting value.

PART IV: EXECUTION AND DEVELOPMENT

12.- Roadmap

- **Phase 1: Foundation** (complete): White Paper, GitHub & Team formation.
- **Phase 2: Prototype:** MVP Landing and Forge, Smart Contracts on Saigon Testnet, apply to Ronin Grant. (at the moment)
- **Phase 3: Testing, Win Ronin Forge Grant.**
- **Phase 4: Launch** (Main Goal): Mainnet deployment, Recipe Deployment Strategy: "Opening the Seals" (GTM1), Go-to-Market Strategy: "The Awakening of Genesis Mining" (GTM2), Liquidity on Katana.
- **Phase 5: Growth:** Scholarships 2.0, DAO, Physical Events with Pet adoption events and WEB3 Education & games events (for onboarding new users)

13. Team and Advisors

- Founder & CEO: **Camilo Yonhson** (CEO of "Satoshi to the moon" web3 education on instagram). Member of Chile DAO, is also a member of the "Chilean Blockchain Chamber", where he serves on the Transgamification and Metaverse Directorate and the Education team.

Vision for ScorchCore Protocol:

"My vision is to revolutionize the utility of NFTs, starting with the Ronin chain, through innovative mechanics that reward holder loyalty. I aspire to transform static assets into dynamic experiences, introducing 3D collectibles with movement and fluid animations that capture the living essence of transformation. In version one, each design will honor the unique nature of the Axes and deeply respect the existing ecosystem, avoiding the dilution of their symbolic value. ScorchCore will not only generate new utility but also celebrate the history of each NFT, making holders custodians of an evolving digital legacy."

- **Danilo Contreras "Stragos"** – Chief Technology Officer (CTO). A software developer with a degree, specializing in web architecture, blockchain, and distributed systems. He has worked on the development of complex web platforms, payment integrations, SSR, frontend and backend performance optimization, and the construction of components

and micro-interfaces. A Web3 enthusiast, he contributes his expertise in smart contract development, EVM security, design patterns, and contract deployment in test and production environments.

Danilo leads ScorchCore's technology strategy. He is responsible for the protocol's security architecture, the oversight of Smart Contracts, and the technical integration with the Ronin Blockchain infrastructure. His role ensures that the "Alchemy of Rebirth" is not just a magical narrative, but a secure, auditable, and scalable technical process, protecting user assets and the integrity of the \$CORE token.

- Christian Pérez de Arce - A software engineer passionate about bringing cutting-edge technologies into users' everyday lives. With an entrepreneurial mindset and recent experience building AI-powered SaaS architectures, he stands out for his ability to identify needs in real-world environments and transform them into efficient digital solutions. On this project, he leads web design by combining his technical expertise in blockchain environments with a user-centered design philosophy, ensuring that the complexity of the network translates into a clean, modern, and accessible web experience.

Advisors

- **Carla Palma "Muffin" – Lead Game Designer & Gamification Specialist** A fundamental collaborator since the genesis of ScorchCore, Carla brings the creative vision that breathes life into the ecosystem's mechanics. As the architect of the ludic experience, she specializes in designing interactions from the "Forge" onwards. Her role is crucial in transforming transactional processes into immersive and rewarding gameplay experiences. Carla is responsible for balancing the economy with entertainment, ensuring that every stage—from the Alchemical Transmutation to the CoreMiner challenges—keeps the user engaged through intuitive gameplay dynamics and coherent visual storytelling.
- **Guillermo Sepúlveda Castro – Gamification & Sociology Advisor** A Sociologist and Master in Organizational People Management, Guillermo boasts over a decade of experience as a professor and consultant in gamification (University of Concepción, Arcos Institute, USEK). He is the founder of "The Last Art" (*El Último Arte*) and co-founder of the Academy of Ludicity and Paidetic Thought. Specializing in "Transformational Neo-Gamification," he brings to ScorchCore a deep understanding of how gaming shapes human behavior. His role ensures that the ecosystem's dynamics go beyond simple entertainment, fostering a genuine ludic culture where players do not just interact, but meaningfully inhabit the digital world.

- **AlphaDocere – Digital Strategy & Acceleration Cell** A Chilean-Argentine alliance integrated into ScorchCore as an enabling partner. AlphaDocere does not seek narrative spotlight but provides the structure, methodology, and execution capacity needed to transform the project's vision into tangible reality. Their approach focuses on requirement discovery, MVP definition (Landing Page & WEB App), and process organization to ensure rapid and sustainable progress.

Mauro Rojas – Strategic Guide: Facilitates general coordination and provides technical-methodological criteria. His philosophy is to create safe spaces for the core team's creative exploration.

Juan Bisaguirre – PMO: The project's metronome. Juan ensures task tracking and clarity, combining a rigorous method with a human approach that guarantees the entire team understands the construction step-by-step.

Nicolás Fernández – MVP Development: Specialist in making concepts tangible. His focus is on efficient technical implementation, thriving on the process of converting theory into working solutions.

Guardini Philama – Backend Support: Guarantor of technical continuity. His collaborative and constant approach is key to unblocking infrastructure issues and pushing server-side development forward.

- **Luis "Roko" Arraez – Product Designer**

A UX/UI design and data visualization specialist with over five years of proven experience, Roko is a Blockchain certified professional and second-place winner at the Avalanche Hackathon in Santiago, Chile. He combines the creativity of graphic design with the analytical skills necessary for Web3 product development. As a design lead at ScorchCore, he is responsible for translating Burn-to-Earn protocol metrics into a functional, scalable, and engaging interface for the global Axie Infinity community.

14.- Technical Integration with Ronin

Smart Contracts: Solidity

Smart Contracts Deployed (Testnet Saigon)

Core System - Contrato Dirección Función

- **CoreMinerNFT** 0xC119c50166D7DC9866a1548E5B6c70A354c0c8D6
(NFTs from miners)
- **GeodeNFT** 0x22A5587085f6717E2462Ef2eFF0DD0AcFa354FEc
(NFTs From Geodas)
- **Transmuter** 0x8a0F8989A4ce18066eA186df793E8ab0e65F8bc6
(forging system)
- **MiningPool** 0x4E9fAd24C85b73164D74FAe1204A4ec10046BA3
(Core Mining)

Tokens - Token Dirección Supply

- **\$CORE** 0x236E0F5652e8f8863C1CB1E599bB309020a76539 (2.1B)
- **fCORE** 0x66871e6949493f02b81047693430ac2Fda3bcC98 (Variable)

Advanced Economics - Contract Management Function

- **PriceOracle** 0xd2952D4B4aeF2316f87F45814f3B73eE70fc3acd
(On-chain price)
- **BuyBackFund** 0xA5911Bd91eEc413299e942a73C875Df7b75c92F1
(Buyback + Burn)

(Vesting schedules)
- **EmissionSchedule** 0x17e7fF5766793e14Ae87c8CE684FFe4AecA2Ce85
(Halving system)
- **TrustScoreManager** 0xc91cf64e7405730483C2EB38AaeBE353aC8dF041
(Reputation)

Advanced Features - Contract Management Function

- **RecipeRegistry** 0xC6e73d8f0BebBA3FB6e0D44eD1a2CAF5cb0D2Ab4
(Forging recipes)
- **SetRegistry** 0x63685c0948274114d391c409483aE3F228B25a53
(Set bonuses)
- **CollectionTracker** 0x42FC08E6bAba091A11D379258C2B257FE91C4434
(Tracking collections)
- **CycleManager** 0x516463ceD938697B53EE46df84899f019D89a341

(Cycle system)

- **AxieStakingManager** 0xA8d03465EaB62abb3a1e99b062e4dFDef04e24A4
(Staking of Axies)
- **Total: 15+ deployed and functional contracts**
- **We will restructure the contracts after Ronin arrives at Optimism.**

9.1. Advanced Interoperability: CoreMiners' Utility Across Ronin

Beyond their primary function in the ScorchCore Protocol, CoreMiners are designed to be actively interoperable and useful in other games seeking collaborations and applications within the Ronin ecosystem. (Pixels, Kaidro, Moki, SunflowerLand, Ronkeverse)

15.- Growth Strategy

- Ronin Forge Grant: Seeking \$98,000 USD to accelerate the MVP and ensure a full year of operations. Plus \$x for Initial liquidity of the token.(appointed by Ronin Forge Grant)
- Advertising Revenue Model: Optional, incentive-based.
- Sponsored Burn Events: Collaboration with Sky Mavis.
- Influencer Collaborations.
- Web3 Ambassador Program.
- Creation of Web3 educational content for in-person events.
- Integration with Ronin Bounties (Massive Gamification)
- Strategic Collaborations and Expansion of the Collectible Universe. Forging alliances with leading NFT collections and active blockchain games.(V2, V3, etc.)

15.1. Governance (DAO)

The DAO will decide on economic parameters, new content (Fenix Protocol = V3, V4, etc.), treasury management, strategic alliances, and fair play policies.

15.2. Community Development Competitions: The "Creator Forge"

To decentralize content creation and leverage the talent of our community, the ScorchCore protocol DAO will oversee the "Creator Forge": a series of regular competitions to design and develop new minigames for the ecosystem using CoreMiners as inspiration.

16.- Fund Allocation (Year 1)

Total Request: \$98,000 USD. For the complete V1 development (1 year of work, 4 team members) Plus \$50,000 for Initial liquidity of the token.

Distribution	Salary per month	Salary in the year
Founder (CEO) Salary:	2500	30000
Technological Development (CTO)	2000	24000
Web Developer	1000	12000
Social Networks	1000	12000
NFTs Collection 315 Characters. Commission of artists, scripts and transaction costs. (6-second MP4 standard.)		10000
Marketing: \$5k.		5000
Legal: \$5k.		5000
Liquidez inicial en Katana (RON/CORE)		50000

17.- Social Responsibility

- **Animal Shelter Donations:** A percentage of the annual treasury revenue is donated to shelters.
- **Donation Agreement:** DonationVault.sol for Axie community donations to shelters.
- **In-person Events (starting in Chile):** "ScorchCore Gaming Meetups" (Web3 Education and Onboarding).
- **Pet Adoption Campaign Events:** Adopters receive an NFT linked to the soul of their adopted pet. (Proof of Adoption)

18.- Conclusion

The ScorchCore Protocol addresses the urgent threat of bots or corrupt developers, overproduction of NFTs, asset inactivity, poor onboarding, and low user retention. Through Alchemical Transmutation and a circular economy, we not only generate sustainable utility but also strengthen the entire Ronin economy. With deflationary tokenomics, a clear roadmap, and a dedicated team, ScorchCore is positioned to become a pillar of the Ronin blockchain. We invite the community, investors, and Sky Mavis to join us on this mission.

Appendix A: Glossary

- Axie Resonance Mining: A system for staking Axies to generate base mining power.
- CoreMiner: A productive NFT resulting from the transmutation of Axies, which mines \$CORE tokens.
- Forge&Collect-to-Earn: A mechanism for using inactive assets (Axies or tokens) to obtain a new NFTs.
- Forge: The initial crafting process where Axies and AXS are used to create an "Alchemical Geode" NFT.
- Alchemic Geode: An intermediate NFT, similar to an egg, obtained from the Forge. Each Geode can be staked, sold, or hatched to obtain a CoreMiner.
- Alchemical Hatching: The process of "opening" or "incubating" a Crystal Geode to reveal one of the seven possible CoreMiners associated with it.
- Critical Chance: The 1% chance during Alchemical Hatching of obtaining a CoreMiner of exceptional rarity and power.
- Crafting Materials: Items such as "White Fang" or "Pink Feather" obtained as compensation after a Forge failure, which will be useful later.
- Trust Score: An on-chain reputation system that measures a player's legitimate participation.
- Proof of Humanity (PoH): Verification that a user is human and not a bot.
- Soulbound Tokens (SBTs): Non-transferable NFTs that represent achievements or identity.
- Annual Halving: A 50% reduction in mining reward issuance each year, controlling inflation.
- DAO: A Decentralized Autonomous Organization that enables community governance.
- CoreMiner: A collectible and productive NFT resulting from the transmutation of Axies, capable of mining \$CORE tokens.
- Alchemical Transmutation: A controlled burning process of Axies to create CoreMiners, implementing a purposeful Forge&Collect-to-earn mechanic.
- Trust Score: An on-chain reputation system that measures and rewards legitimate gameplay.
- fCORE (First CORE): A temporary, soulbound token representing pending mining rewards.
- Voracious CoreMiner: A special type of miner that offers higher productivity but requires periodic Axies burning for maintenance.
- IdNFT: A sovereign digital identity system for human verification.
- Set Synergies: Passive bonuses obtained by completing specific CoreMiner collections.
